

Front-End Coding Challenge

Project 1

Project 2

Challenge: Complete these 2 Projects using HTML and CSS. You have to code the objects (Bat and Flower Circle) using HTML and CSS. These are not any images. **Deadline:** 24 Hour

How and where to submit: After completing the projects, upload your code in the public Github repository and any live server you prefer (Netlify, Heroku, etc.). Then fill up this form below with all the information and submit it.

Form: <https://forms.gle/DQH13iXefzsEaQiv9>

Warning: You can't use **ChatGPT** to write code for your projects. We will check code plagiarism. If we found that you used any AI Tool to complete your projects, we will disqualify you.
